DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/09/2008 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Mark D. Miller on 11/07/2008.

The application has been amended as follows:

Regarding claim 10:

line 24, "." has been deleted.

line 24, add -;- after "data".

line 26, add -e. overwriting said stored video data with said new video data-.

Allowable Subject Matter

Claims 1-2, 5-10, 12, 15-16, and 18-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, "establishing at least one rule for each of said priority levels, wherein one of said rules comprises a retention time; assigning one of said priority levels and a creation time to each unit of incoming video data; thereafter, for each unit of incoming video data, and beginning at the lowest priority level and continuing to successively higher priority: examining stored video data and identifying a location on said medium where the difference between the creation time of the incoming video and the creation time of video data stored at such location is greater than the retention time applicable to said priority level; and storing said unit of incoming video data by overwriting stored video data at said identified location," which are unique features that are not disclosed by prior art.

Claims 2, 5-9, 19, and 21 are allowable because they depend on independent claim 1 above.

Claim 10 recites, "establishing at least one rule for maintaining stored data at each of said priority levels, wherein one of said rules includes a retention time; assigning one of said priority levels and a creation time to each new data unit; and beginning with the lowest of said priority levels and continuing to successively higher priority levels, and also beginning with stored data having the oldest creation time and continuing to stored data having successively younger creation dates and times, identifying stored data that may be overwritten as that data for which the difference between the creation time of the incoming data and the creation time of the stored data

Art Unit: 2621

is at least equal to the retention time applicable to the priority level of said stored data,” which are unique features that are not disclosed by prior art.

Claims 12, 15, and 22-24 are allowable because they depend on independent claim 10.

Claim 16 recites, “establishing at least one rule for maintaining video data at each of said priority levels, wherein one of said rules comprises a retention time; assigning one of said priority levels and a creation time to each incoming video data unit; using a table to maintain at least an assigned priority level, a creation time, and an address for any units of video data stored at each of a plurality of storage locations on said storage medium; if said table reflects that empty storage locations are available on said storage medium, storing said units of incoming video in those empty storage locations and updating the corresponding entries in said table; and if units of incoming video data remain to be stored and said table reflects that empty storage locations are not available on said storage medium, then scanning said table to identify an entry for a stored video data unit that may be overwritten, said scan beginning at the lowest of said priority levels and beginning with the oldest creation time at such priority levels, and moving progressively forward from the oldest entry within each priority level, and progressively upward from the lowest priority level: identifying a table entry corresponding to a storage location where the difference between the creation time of the incoming video and retention time reflected in the table entry for such location is greater than the retention time applicable to said priority level, and for each such identified entry,” which are unique features that are not disclosed by prior art.

Claim 18 is allowable because it depends on independent claim 16 above.

Claim 20 recites, "establishing at least one rule for each of said priority levels, wherein one of said rules comprises a retention time; assigning one of said priority levels and a creation time to each unit of incoming data; for each unit of incoming video data, beginning at the lowest priority level and continuing to successively higher priority levels, examining stored video data and, beginning with a stored video data having the oldest creation time and continuing to stored video data having successively younger creation dates and times, determining whether the difference between the creation time of the incoming video and the creation time of the stored video currently being examined is not greater than the retention time applicable to said priority level," which are unique features that are not disclosed by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
